

## DRUM COMPACTOR/CRUSHER

[close](#)

- Will crush an empty 55 gallon steel drum from full size down to approx. 6"H.
- Automatically resets itself in less than 25 seconds.

Crushing platen has a spike that pierces the lid of a closed head drum to relieve pressure. Crushing features may also be used with smaller drums. Compacting feature may be used for compacting contents of 55 gallon drums only. Compacting platen is 21" dia. Three position switch controls "Crush-Off Compact" selections. Tools are not required to remove easy in-out crush platen.

Standard 203-230/460V.  
 3 phase. Single phase available.
