

⚡ THE RAPTOR DRUM HANDLER

- Easily remove drums from containment skids or full pallets.
- The Raptor employs a parrot beak style grab that is able to handle virtually any kind of drum.

Simple design allows the operator to load or unload drums from containment pallets. Uniquely able to glide over standard pallets and grab drums from the middle of the pallet. Comes with 6" poly wheels for easy maneuverability. Rear caster is equipped with a brake for added safety. Handles loads up to 800 lbs. FOB Shipping Point.
